Touch Chat		https://apps.apple.com/gb/app/touchchat-hd-aac/id398860728	£129.99	<p>TouchChat fits into the category of assistive technology known as Augmentative and Alternative Communication (AAC) and includes features that were previously only available in much more expensive dedicated devices. Words, phrases and messages are spoken with a built-in voice synthesizer or by playing a recorded message. Various English and Spanish synthesized voices are available, allowing the user to choose a voice that fits their own personality.</p> <p>TouchChat also has a unique feature whereby one can simply tilt the device to make the message expand to fill the screen in large letters. This feature allows a person to communicate silently or in a noisy environment.</p>
Proloquo4text		https://apps.apple.com/us/app/proloquo4text/id751646884	£99.99	<p>Proloquo4Text™ is a text to speech app for those who cannot rely on their voice to speak. The app is laid out on a single screen to reduce the effort of typing. The layout enables easy, daily conversation and quick access to your most common phrases. Personalize it to your needs and preferences, whether that's through choosing from the many voices available, or through customizing your screen layout.</p>
Proloquo2go		https://apps.apple.com/us/app/proloquo2go-aac/id308368164	£219.99	<p>Tap images. Type words. Speak. Proloquo2Go is an easy to use communication app for people who cannot speak or need help being understood. Featuring natural sounding voices, including real children's voices, Proloquo2Go is a simple yet powerful AAC (augmentative and alternative communication) tool. The app is fully customizable and can be utilized to build language skills and grow with a person's communication, supporting both beginning and advanced communicators.</p>
