

Having

a

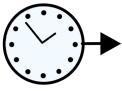

Covid 19

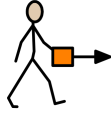

test

Somebody

will

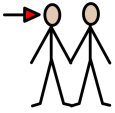

take

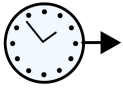

a

swab.

They

will

put

the

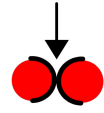

swab

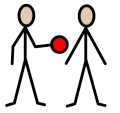

in your mouth

+

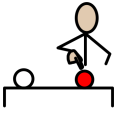

touch

your

tonsils.

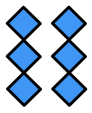

This

might

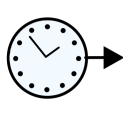

tickle!

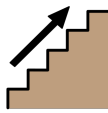

The same

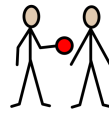

swab

will

go up

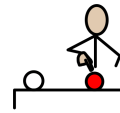

your

nose

+

this

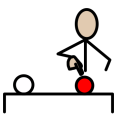

might

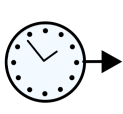

feel

funny.

This

will

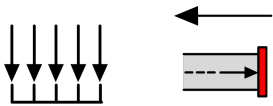

be for

10

10

seconds.

Then it is all finished.
