

Top Fine Motor App's

<p>Dexterity</p> 	<p>One of my most used fine motor app's. Divided into 3 sections;</p> <ul style="list-style-type: none"> • Tap It- isolating fingers and tapping • Pinch it- pinch crabs using pincer grip • Write it-Letter and Number formation
<p>Finger Count</p> 	<p>This is an unusual app. It starts with a blank black screen, each time you touch the screen with a fingertip it marks a number, adding on each time it is touched again. If you touch with 3 , 4 , 5 finger tips in one go, it will jump up by 3,4,5 etc. Time how long it takes a student to get to 50 or 100 – tell students if you use more fingers you will reach the target number quicker.</p>
<p>Mazing</p> 	<p>Good graduation between levels, visually clear mazes to trace with fingertip.</p>
<p>Sam Phibian</p> 	<p>Fun clear animation Feed the frog by touching and dragging. Made more complex by following instructions of what to feed the frog. Very appealing to children.</p>
<p>Cookie Doodle</p> 	<p>Fun cooking activity, students need to follow multi step activity to make cookies. Lots of choice options and you need to be relatively accurate when placing decorations/</p>

	<p>icing. Motivating app- several steps for sequencing skills as well.</p>
<p>Pick-up sticks</p> 	<p>Simple and easy to play Like the traditional game- how long will it take to pick up all the sticks?</p>
<p>Fruit Ninga</p> 	<p>Students of all of ages like this activity- you need to slice flying fruit to gain points.</p>
<p>Finger Fun</p> 	<p>This app currently is a free app for iPhone/iPad that is described for children ages 2-6 years of age. It is rather unique as it requires finger isolation skills while touching dots. One or more dots can be presented on the screen at a time requiring simultaneous touching to complete the task. One hand or two hands, fingers must touch the dots at once for a picture reward to be shown.</p>
<p>Wow! Doodle</p> 	<p>A great fine motor package of activities for student to try- visually fun and cartoon looking.</p>
<p>Alien Buddies</p> 	<p>A variety of visual motor and visual perception tasks.</p>

Clicky Sticky

Use drag and drop skill to create a variety of scenes- a nice way to end the session.

We continue to use and review app's- if you have a favourite you would like us to try- please contact us at SERC www.redbridgeserc.org.
